

The fields of activity of *MUSASHI Hungary Manufacturing Ltd.* are *machining* and *assembly of metal components*. Our primal technologies are turning, grinding, milling, drilling, and induction hardening. Our company aims to continue its activities, taking into account environmental considerations. Environmentally conscious thinking and operation is an important element of the company's basic philosophy.

*MUSASHI Hungary Manufacturing Ltd.* operates an environmental management system in accordance with ISO 14001:2015 standard.

Our goal is to achieve environmental performance that we can be proud of, to gain the trust of our customers and stakeholders, to be good neighbours, and to contribute to sustainable development.

To achieve our goals:

- We commit ourselves to avert the pollution of the environment and continuously make efforts to decrease our environmental emission.
- We comply with the environmental protection legislations, national and international standards and our internal regulations.
- We comply with the legislation, national and international standards and our internal regulations guiding the handling and management of chemical substances.
- We comply with laws, regulations and standards as well as internal regulations relating to greenhouse gases.
- We comply with laws, regulations and standards relating to noise pollution, as well as internal regulations. We strive to minimise our noise emissions.
- Our company is committed to preventing soil contamination and preserving soil quality. We comply with relevant legislation, resolutions, standards and internal regulations.
- We set environmental goals and targets, which we implement through environmental programs, continuously monitoring their fulfilment.
- In our activities, our primary goal with regard to waste generated by our technologies is the selective collection and disposal of waste, and recycling where possible.
- In our activities, we use energy, water and materials economically and save them. We strive to use renewable energy sources.
- We evaluate our environmental performance at regular intervals and continuously improve our environmental management system based on this evaluation.
- We regularly inform our employees about the performance and changes in our environmental management system and provide them with up-to-date information.
- We expect our suppliers to conduct their activities in accordance with the requirements of the environmental management system we operate and in compliance with legal requirements.
- The Company considers it extremely important to promote environmental awareness and environmentally conscious thinking among its employees, suppliers and subcontractors in order to achieve a higher level of satisfaction among stakeholders.
- We expect our employees to work in an environmentally conscious manner, which is supported by regular training.
